## DETAILED ACTION

### *Election/Restrictions*

Applicant's election with traverse of Group I, Species I, claims 1-6 and linking claim 23 in Paper No. 8 is acknowledged. The traversal is on the ground(s) that claims 1-6 and linking claim 23 read on the elected Species I. This is not found persuasive because claims 3-6 do not read on the elected Species I. Since applicant had not specified any generic claim, examiner assumes that there are no generic claim in this application.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-2 and 23 read on the elected Species I and will be examined as follow.

### *Drawings*

Figure 6(b) should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, applicant should clarify what is intended by "is effected by one self-crossing and two crossings of each other winding *having turns in said intermingled portion.*" Claims 2 and 23 inherit the defect of the parent claim.

Regarding claim 2, there is no antecedent basis for "having a first winding and a second winding." Applicant should clarify what is intended by "substantially *the whole of both windings.*"

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 23, as best understood in view of the rejections under 35 U.S.C. 112 second paragraph, are rejected under 35 U.S.C. 102(b) as being anticipated by Rabjohn [US 4,816,784].

Rabjohn discloses a planar transformer [figure 3(a)] in an integrated circuit comprising:

- first and second windings [14, 16] having the same number of turns.

wherein the windings having an intermingled portion in which at least a portion of the first winding intermingled with at least a portion of the second winding and each full turn of each

winding in the intermingled portion is effected by one self-crossing and two crossing of each other winding *having turns in said intermingled portion.*
